

*My name is Brigid Sinclair, Nurse Practitioner new to Silverstream Medical centre.*

*As a Nurse Practitioner I have undertaken additional training to work at an advanced level of nursing, and am able to assess, treat and diagnose a range of conditions. I can see patients for most things you would see a GP for and you can book with me on your patient app or by phoning reception.*

*My areas of interest include women's health, mental health and emergency care. I have spent time as a firefighter and responding for St John ambulance. Outside of work you will find me with my collection of animals on the farm; I like nothing better than to get outdoors.*
